

**ZONE**  
ARCHERY

# Owners Manual

## BOW SET LIST OF ITEMS

The Zone Archery Hunter Recurve is for those who prefer the power and modern appeal of a hunting bow.

The starter kit comes with everything you need to learn archery. All of the items you see on this page are hand picked to give you all of the essential components.

We recommend grabbing a nice soft archery target if shooting at home, and checking back in with us when you need a top up of arrows!

**Recurve Limbs**

The bottom limb has the bow size displayed

**Recurve Riser**

The handle, complete with bolts to attach your limbs

**Hip Quiver & Arrows**

12 arrows to get you started, stashed in a convenient hip mounted quiver

**Arm Guard**

Protect your forearm from string slap

**String Wax**

**Stabilizer**

Shock absorber and balancer for your bow

**Arrow Rest**

Guides your arrow for an accurate shot

**Bow Sight**

5 pins to tune in at different distances

**Arrow Puller**

That extra grip to retrieve your arrows if they get stuck

**String Nocking Clips**

**Hex Key Tool Set**

**Bow Stringer**

Use with the included Bow String to get your recurve ready to shoot

## BOW SET LIST OF ITEMS

That extra grip to retrieve your arrows if they get stuck

**String Nocking Clips**

**Hex Key Tool Set**

**Bow Stringer**

Use with the included Bow String to get your recurve ready to shoot

## Set Up Information

Setting up a takedown recurve bow is a transferable skill between any takedown recurve bow. The best way to set your bow up is to see it demonstrated in person, so we did the next best thing and made a video on how to get your bow ready to shoot. Type this url in to your browser to see us set up a recurve bow;

<https://youtu.be/lx7CuEs2B1Q>

The bow used in the video is a different model (similar to the Traditional) but gives you all of the crucial steps from attaching your bow limbs to the riser, how to use a stringer and installing a nocking clip.

If you follow these steps your bow will be ready to shoot, and if you prefer you can use the any additional accessories that come with it for extra customisation.

Make sure you nock your arrow firmly to the string before shooting, and research how to shoot a bow with correct form - your local club, online video guides and even contacting us by phone or email is advisable for a first time archer!

## Safety information

- Never dry fire your bow (shooting without an arrow).
- Always make sure the arrow nock is secure on the string before shooting.
- String and de-string your bow with a bow stringer.
- Store bow by de-stringing to remove tension, and leave in a cool place.
- Always shoot at a soft, dense target (foam or bag targets work best)
- For the best safety and performance, research written and video guides online on how to set recurve bows up and correct shooting form.

## Warranty information

Zone Archery products are covered by a 1 year warranty. Any defects including accessories on the bow will either be repaired or replaced.

Warranty does not cover consumables such as the bow string or arrows which will need to be replaced after a certain amount of use. It will also not cover any misuse of the product such as, but not limited to, dry firing the bow.
